Juniper Green Energy Commissions Additional Wind Capacity Across Rajasthan and Gujarat Under SJVN FDRE Project

New Delhi, October 16th , 2026: Juniper Green Energy Limited has commissioned additional wind capacity at Fatehgarh IV Section I in Rajasthan and Jam Khambhaliya in Gujarat under its 200 MW contracted capacity SJVN FDRE I project.

The Company has commissioned additional **65.4 MW of wind capacity across Fatehgarh IV Section I in Rajasthan and Jam Khambhaliya in Gujarat**, comprising 9.3 MW at Fatehgarh IV Section I and 56.1 MW at Jam Khambhaliya. With these additions, the total wind capacity commissioned under the project stands at **175.35 MW**.

Implemented through Juniper Green Stellar Private Limited, the Company has a Power Purchase Agreement (PPA) with SJVN Limited for 200 MW of contracted capacity under the SJVN FDRE I project. The project comprises 259 MWp of solar capacity, 280 MW of wind capacity and a battery energy storage system (BESS) of 201 MWh out of which the Company has already commissioned the entire 259 MWp solar capacity and 201 MWh BESS .

Commenting on the development, Ankush Malik, Wholetime Director & CEO, Juniper Green Energy Limited, said:

“The commissioning of additional wind capacity at Fatehgarh IV Section I and Jam Khambhaliya marks another important milestone in the execution of our SJVN FDRE project. With the entire solar and battery energy storage capacity already commissioned, we continue to make steady progress on the wind component. These milestones reflect our focus on disciplined project execution and timely delivery as we strengthen our portfolio of integrated renewable energy projects and contribute to India’s clean energy transition.”

The latest commissioning milestones reflect Juniper Green Energy’s continued focus on accelerating project execution and expanding its operational renewable energy portfolio. Progress across the project reinforces the Company’s capabilities in developing and executing integrated renewable energy projects combining solar, wind and battery storage.

About Juniper Green Energy Limited

Juniper Green Energy Limited is an independent renewable energy power producer in India, focused on the development, construction, and operation of utility-scale solar, wind, hybrid, and Firm & Dispatchable Renewable Energy projects. The Company has been developing renewable energy assets across India since October 2018 and has built integrated capabilities spanning the entire project lifecycle, from project conceptualisation and development to construction and operations. Juniper Green Energy Limited has an operational capacity of approximately 2.8 GWp and 603 MWh BESS and a total portfolio of more than 11 GWp and 8.9 GWh BESS, where the total portfolio includes operational, under-

construction, contracted and awarded projects. The Company is committed to delivering reliable and sustainable clean energy solutions that support India's transition to a low-carbon economy.
